

## WHO SAYS YOU CAN'T SEE THE FOREST (CITY) FOR THE TREES?

Forest City Gear has a very "tree to see" way of doing business. We look at your product, the purpose of the gears in the overall mechanical system, process, your manufacturing requirements and many other factors. Then, our Forest City Gear engineers help devise the best solution for your needs.

Using the industry's most advanced technologies for gearmaking and gear finishing, the next step is the production of prototypes for your approval. Often times, we use a better solution and suggest immediate changes we have to "tree size fit all" versatility in the real world of our company. It's precisely this flexible approach to gearmaking and our innovative thinking that's made us a longtime leader in the industry.

That fact is borne out nowhere better than at the many other gear companies for which we work, helping them solve problems and performing routine operations that are recognized worldwide for their accuracy, repeatability and part verification process.

Forest City Gear people have a passion for what we do and that's also very easy to see in the many gear industry awards and high standard recognitions we've achieved.

Get the picture? Then, we invite you to look to Forest City Gear for your next "you're perfect" product. Go to [www.forestcitygear.com](http://www.forestcitygear.com) and have a "look" for yourself! Doing is believing.
