

WHO SAYS YOU CAN'T SEE THE FOREST (CITY) FOR THE TREES?

Forest City Gear has a very “easy to see” way of doing business. We look at your product, the purpose of the gears in the overall mechanical motion process, your manufacturing requirements and many other factors. Then, our Forest City Gear engineers help devise the best solution for your needs.

Using the industry’s most advanced technologies for gearmaking and gear finishing, the next step is the production of prototypes for your approval. Often times, we see a better solution and suggest it immediately, because we have no “one size fits all” mentality in the mind’s eye at our company. It’s precisely this flexible approach to gearmaking and our innovative

thinking that’s made us a longtime leader in the industry. That fact is borne out nowhere better than at the many other gear companies for which we work, helping them solve problems and performing machine operations that are recognized worldwide for their accuracy, repeatability and part verification protocol.

Forest City Gear people have a passion for what we do and that’s also very easy to see, in the many gear industry awards and high standard recognitions we’ve achieved. Get the picture? Then, we invite you to look to Forest City Gear for your next “picture perfect” product. Go to www.forestcitygear.com and have a “look” for yourself. Seeing is believing.
